

Joelle Hagen

User Experience Designer + Researcher

RELEVANT EXPERIENCE

UX Designer II | Inspire, Arlington, VA (remote)

MAY 2021 - PRESENT

Progressive web app and mobile app design for the largest growing social media platform for health

- Creating innovative designs that led to an updated version of the legacy product including a dynamic member profile, adaptable universal navigation, streamlined onboarding process, all represented in desktop progressive web app as well as mobile
- Collaborating with research and product management to originate a UX design practice for new features considering quantitative and qualitative data and best practices to create an efficient, user-centric process leading to sustainable, scalable solutions
- Leading the design of a \$20 million project to conceptualize and prototype an emerging product that will become a cornerstone of the company and real world data sectors, producing animations and clickable wireframe for 10 concept tests

UX/UI Designer | Children's Tumor Foundation, Seattle, WA

OCTOBER 2020 - APRIL 2021

Grant Winner- Symptom Tracking tool for Children with Neurofibromatosis

- Serve as the sole UX/UI Designer on a team of data scientists and software engineers who won the top prize at Hack for NF and was awarded a \$12,500 grant to build application
- Conducted domain research, interviewed NF patients and researchers, and synthesized data to establish user needs and pain points
- Built mid-fi and high-fi wireframes, incorporating data science algorithms and collaborating with front-end engineer
- Contributed illustrations and animation to be included in final deliverable
- Developed a prototype to complete usability testing and gather data for alpha launch

EDUCATION

The Flatiron School

Seattle, WA
UX Design

SEPT 2019 - MARCH 2020

Southern Oregon University

Ashland, OR
BA Theatre Arts

AUG 2010 - AUG 2014

UX/UI Designer | Personae, Inc., Seattle, WA

APRIL 2020 - OCTOBER 2020

Data synthesis and annotation web application construction

Contract under NDA

- Served as the sole UX/UI designer on a team of software engineers and data scientists
- Conducted domain research and market research as well as user informational interviews to define requirements and user needs for an MVP
- Constructed high fidelity wireframes and user flows, meanwhile collaborating with the development team using priority matrices to achieve the most efficient, human-centered result
- Created and facilitated 6 usability tests through moderated interviews and analyzed using a mixture of affinity mapping and success/fail metrics to influence future iterations

UX Design Lead | FeetFirst, Seattle, WA

JANUARY 2020 - MAY 2020

Website redesign project for a pedestrian advocacy non-profit

- Led a team of five designers by managing and supporting the team using Trello, Google Suite, Figma and Zoom
- Collaborated directly with members of the organization's board of directors through weekly meetings and regular email updates
- Guided domain research, created and administered remote surveys to gather data to inform primary user needs and conducted six informational interviews to build user requirements
- Synthesized data to create testable prototypes, mood boards and subsequent iterations to build an intuitive and communicative high fidelity mockups for the development team

Freelance Stage Manager/Theater Artist, San Francisco, CA

AUGUST 2012 - DECEMBER 2017

- Managed performances for arts organizations including opera, dance, theater, musicals and lectures
- Coordinated production schedules for up to 100 artists and technicians at a time
- Kept diligent records and reports of all changes made in rehearsals and production meetings, distributing them to appropriate parties and opening channels of communication
- Generated clear and concise reference documentation representing the production to solidify information and create a universal understanding of operations
